

Department of Psychiatry

Keynote lecture

Dr. Trine Munk-Olsen

National Center for Register-based Research
Aarhus University, Denmark

Date: Tuesday, June 25th

Time: 16.30-17.30h

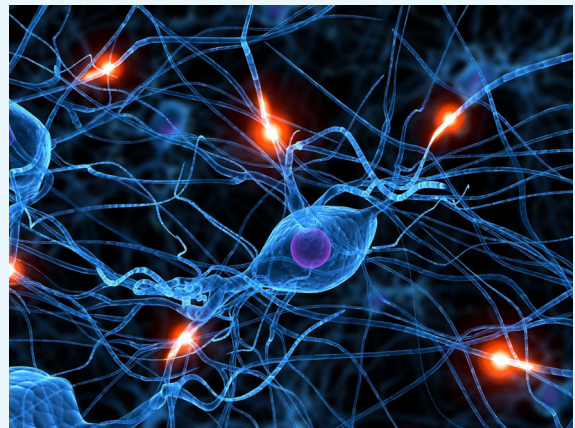

Location: OWR 31, Onderwijscentrum

Epidemiological studies on postpartum psychiatric disorders:

What do we know by now?

Abstract:

Danish population registers have been very helpful in describing the magnitude and timing of risk of postpartum psychiatric disorders in a wide range of studies. This lecture will provide an introduction to current knowledge in the field from epidemiological studies, and will cover topics such as established risk factors and the specific triggering of bipolar affective disorder after childbirth.
